SUMMARY

With over 6 years of experience as a frontend engineer specializing in financial, commercial, and health applications, I excel in leveraging modern frontend technologies like React.js, Vue.js, and Next.js, as well as cross-platform mobile technologies like React Native, to deliver exceptional user experiences. I have a proven track record of improving user engagement, retention, and SEO performance. Key achievements include enhancing the mDoc CompleteHealth mobile application and leading the frontend development of its scalable web infrastructure.

EXPERIENCE

Senior Mobile Developer

10/2023 - Present

mymDoc - Full-time ↗

- Spearheaded the overhaul of the mDoc CompleteHealth mobile application with React Native, addressing a backlog of issues and enhancing customer retention through targeted improvements.
- Pioneered the frontend development of the web-based infrastructure for the mDoc CompleteHealth application using React.js, laying down a robust architectural foundation for seamless user experience and scalability.
- Revamped the foundational architecture of mDoc's landing website using Next.js, enhancing user navigation and conversion processes. Implemented enhanced SEO strategies, resulting in a month-on-month increase of over 60% in organic search traffic and achieving first-page rankings on Google.

Senior Frontend Developer

04/2022 - 07/2023

Harness - Contract ↗

- Spearheaded the frontend development of the Harness FI Prize-linked-giving (PLG) project with Vue.js, with targeted marketing that led to over a thousand customer acquisitions in the first month of launch.
- Proposed and implemented changes in the deployment process of various projects, integrating testing libraries for comprehensive testing coverage and linting pipelines, resulting in a significant boost in deployment efficiency.

Senior Frontend Developer

08/2021 - 01/2023

Outpost Health - Contract ↗

- Rebuilt Outpost's web application with React.js, introducing unit and integration testing, which resulted in more bugs being caught and resolved.
- Updated and enhanced Outpost's landing website using Webflow which improved users conversion rate by over 15% in the first month.

React Native Developer

03/2021 - 04/2022

Stanbic IBTC - Contract ↗

- Pioneered the development of the E-Naira mobile application, utilizing React Native for cross-platform development, achieving a 100% on-time completion rate, making Stanbic IBTC the first bank to successfully launch the project in Nigeria.
- Resolved a backlog of over 100 bugs and reported issues, enhancing user experience and improving average store ratings by over half a star.

Frontend Developer

12/2018 - 02/2021

Jensiv Technologies - Full-time

- Designed and implemented the user interface for the Jensiv landing website.
- Designed and launched an intuitive user interface for a storyboard web platform using HTML, CSS, and JavaScript.

Software Development Teaching Professional

07/2018 - 12/2020

Aptech Computer Education - Full-time

- Imparted comprehensive knowledge of web development technologies: HTML, CSS, JavaScript, PHP and Python to students and junior developers, fostering a solid foundation in frontend development.
- Cultivated a conducive learning environment by encouraging creative thinking and addressing individual strengths and weaknesses, facilitating effective learning experiences.
